

**You will apply math, science, communication, and team building skills to work on large and small construction projects, from beginning to end.**

### **Curriculum Highlights:**

You will learn to interpret blue prints and specifications to build structures from rough framing to finish carpentry and operate a wide range of construction tools and equipment.

### **Gain real-life experience working on:**

- Basic safety
- Construction math
- Proper use of hand tools and power tools
- Blueprint reading
- Wood building materials, fasteners, and adhesives
- Floor systems
- Wall and ceiling framing, windows, and exterior doors
- Practical experience with new residential construction application

### **Career Focus:**

You will be prepared for immediate employment as a Construction Equipment Operator, a Construction Laborer, a Framer, Trim Carpenter, or a self-employed Construction Worker. With further education, you can become an Architectural Engineer, a Construction Supervisor, or Site Manager.

“I really enjoy working with my hands and seeing the end result of something I’ve built. Working in construction gives me that opportunity and coming to DACC is preparing me for my career. We not only learn about the building process and all of the details that go into building a house - we also learn life skills and problem-solving skills along the way.”

-Andrew Toulmin  
Construction Technology Student

The Delaware Area Career Center, in partnership with community, is an innovative model for developing lifelong learners, quality leaders, and critical thinkers for the dynamic and global environment.

This 2-year program will prepare you for a career in the construction field with real hands-on experience, such as building a home from the ground up.

You may earn your National Construction Certificate and your Skid Loader Certificate upon completion of both written and performance tests. Additionally, you can earn your 10 hour OSHA Certificate by taking a 10 hour OSHA safety course.

**Additional Benefits:**

- A Chrome Book will be made available to every student in this program
- Learn about the construction trade through participation
- Attend field trips to area businesses
- Hear guest speakers from the industry
- Earn awards for good attendance and grades
- Build a complete house on site
- Participate in hands-on experiences in real community service projects
- Participate in SkillsUSA where you can win local and national recognition
- Participate in apprenticeship opportunities during your junior year in affiliation with Ohio State Apprenticeship Council and the Federal Bureau of Apprenticeship and Training [www.obes.org/apprenticeship.htm](http://www.obes.org/apprenticeship.htm)
- Visit colleges to learn about construction management

Campus Location	North Campus
Grade Level	Junior and Senior
