Career Opportunities:

There are many different pharmacy technician careers available to you. Once certified, more responsibilities and higher earning potential is available to the technician. Opportunities include:

- The retail setting
- Advancement into specialty fields like inventory specialists or medical equipment specialist
- Some stores provide specialized compounding services.
- The institutional setting (hospitals or nursing homes) where techs learn aseptic and clean room techniques to make IVs.
- Nuclear pharmacy where the technician would be trained and certified in handling and preparing radioactive medications.
- Mail order drug companies and call centers are moving to more specialized pharmacy areas as well.

The Delaware Area Career Center, in partnership with community, is an innovative model for developing lifelong learners, quality leaders, and critical thinkers for the dynamic and global environment.

Becoming a certified technician allows you to get a satisfying job directly out of high school and in some cases, before graduating.

Pharmacy tech is also a pathway for students seeking higher education in other health tech fields. With additional training, students might continue on to become pharmacists, pharmaceutical representatives, nurses, or skilled in pharmacy technology (troubleshooting equipment).
